

DATAPURI

FINANCIAL SYSTEM

Datapuri Financial System (DFS) is a financial accounting software to manage your debtors, creditors and general ledger as well as perform Goods and Services Tax (GST) related functions. It is designed for web-based environment with business-critical functionality for SMEs in mind. This software is easy to use with a simple interface while still having advanced filtering and sorting facilities. It also comes with GST management functions built-in. This software provides standard based implementation to increase reliability, scalability, dependability and a lower total cost of ownership.

Built-in features:

- GST Ready and Compliant Financial Accounting System.
- Web-based. Work anywhere, any time.
- Debtor and Creditor management functions with automated GL interface.
- Optional automated GL posting, or automated GL parking for review before posting.
- Unlimited customers and suppliers, unlimited company setup.
- Generation of PDF compliant reports and print-outs.
- Secured with User ID system and detail security by view, edit, add and update function.
- Multi-level Access - Assign different levels of access to different personnel.
- Up to four (4) levels of chart of account set up to manage different categories.
- Minimize posting errors - park your entries and review before posting.
- Power Search for historical transactions with multi-level filters.

How Does DFS Benefit You?

BENEFITS

Simple and User-Friendly

The form entry is customized according to the Source Document Layout for the purpose of shortening the user's learning curve and also minimize error in determining DR or CR entries. We ensure that the system is user-friendly because we view them as your working partner for your daily tasks.

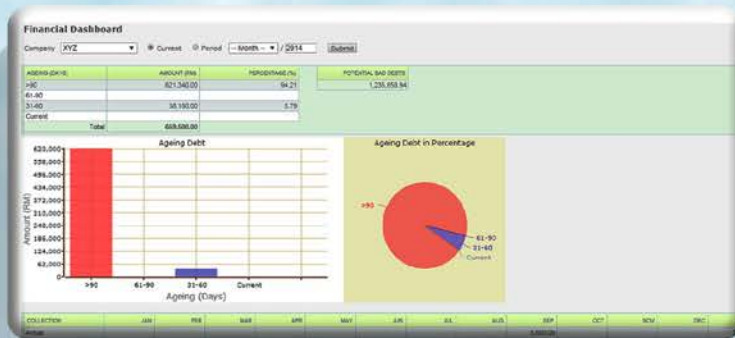

Security on Control and Usage

Administrator can control in a certain page whether a certain user can perform view, edit, add, print or delete functions within a page.

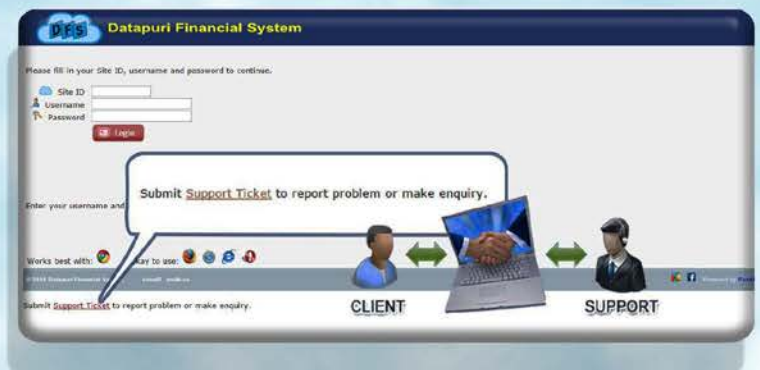

Advanced reporting system with precise information

With DFS, users have instant, precise and real-time reports, either in traditional financial reports i.e. Profit and Loss, Balance sheet, or in more visual form of a dashboard, customized to what your own business performance is measured against.

Self-reporting tools (Support Ticket)

An easy way for users to submit requests, doubts, and any other concerns related to DFS to the System Support Team, whereby the team will response to them within 48 hours. It serves as a communication tool.

GST Ready and Compliant

The Goods and Services Tax (GST) will be implemented on 1st April 2015 which is an inevitable deadline for companies that have a threshold revenue of RM500,000 per annum. Even for companies not opting to be GST registered just yet, it is important to implement a GST ready system in order to cater for company's future growth. DFS comes with built-in functions to automate GST related transactions, and to ensure the relevant interfaces to RMCD (Royal Malaysian Customs Department) are in place. Most important is the electronic GST returns and the GST Audit File (GAF) which need to be submitted to RMCD on a periodical basis.
